

## Revised Quarterly Fund Update

# MIDLANDS MORTGAGE TRUST

For the quarter ended 30 September 2019

### Name of Fund

Midlands Mortgage Trust Group Investment Fund

### This is a revised Fund Update

This revised Fund Update was first made publicly available on 2 June 2020. It replaces the Fund Update published on 30 September 2019. The changes made relate to the annual returns shown in the table and the annual return graph under the section 'How has the fund performed.'

### What is the purpose of this revised update?

This document tells you how the Midlands Mortgage Trust Group Investment Fund ("MMT GIF") has performed and what fees were charged. The document will help you to compare the MMT GIF with other funds. Fund Managers Central Limited ("Manager") prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

### Description of this Fund

The MMT GIF holds cash deposits with registered banks and loans secured by first mortgages over land and buildings. The MMT GIF has a low to medium level of volatility. The investment objective is to provide investors with an income return better than bank deposits.

Total value of the MMT GIF at 30 September 2019	\$53,414,824.30
The date the MMT GIF started	1 / 11 / 2004

### What are the risks of investing?

#### Risk indicator for the MMT GIF

⇐ Potentially lower returns	Potentially higher returns ⇐					
1	2	<b>3</b>	4	5	6	7
⇐ Lower risk	Higher risk ⇐					

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the MMT GIF's assets go up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz/tools/investor-kickstarter](http://www.sorted.org.nz/tools/investor-kickstarter).

Note that even the lowest category does not mean a risk-free investment, and there are other risks (described under the heading 'Other specific risks') that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the 5 year period ending 30 September 2019. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in the MMT GIF.

### How has the Fund Performed?

	Average over past 5 years	Past year
<b>Annual return</b> (after deductions for charges and tax)	5.40%	4.59%
<b>Annual return</b> (after deductions for charges but before tax)	5.40%	4.59%

The MMT GIF does not pay tax on investor income, it does however deduct withholding tax from individual investor returns at their elected withholding tax rate. See the PDS for more information on tax.

The Financial Markets Conduct (Market Index) Exemption Notice 2018 came into force on 17 July 2018. MMT is exempted from the requirement of providing market index comparisons, as there is no appropriate comparative market index and no suitable comparable peer group index for the MMT GIF against which to assess either movements in the market in relation to return from the assets in which MMT invests or the performance of MMT GIF as a whole. Refer to document titled 'No Market or Peer Group Indices' disclosed on the offer register as '20181029 Midlands Market Index Exemption.pdf'.

### Previous complete disclosure years

The graph shows the MMT GIF annual return after charges and tax for each of the last 10 years ending 31 March, up to 31 March 2019. The last bar show the average annual return over the last 10 years, up to 30 September 2019.

**Important:** This does not tell you how the fund will perform in the future.

### What fees are investors charged?

Investors in the MMT GIF are charged fund charges. In the year to 31 March 2019 these were:

	<b>% of net asset value</b>
<b>Total MMT GIF charges [A = B + C]</b>	2.11%
Which are made up of -	
<b>Total management and administration charges [B = D + E]</b>	2.11%
Including -	
Manager's basic fee [D]	1.75%
Other management and administration charges [E]	0.36%
<b>Total performance-based fees [C]</b>	Nil
<b>Other charges</b>	Nil

The above fees are exclusive of GST and represent the actual fees charged for the year.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). Such See the PDS for more information about those fees.

### Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Jane had \$10,000 in the fund at the start of the year and did not make further contributions. At the end of the year, Jane received a return after fund charges were deducted of \$537 (that is 5.37% of her initial \$10,000). Jane paid no other charges. This gives Jane a total return of \$537 for the year before the deduction of withholding tax at her elected withholding tax rate.

### What does the Fund invest in?

This shows the types of assets that the MMT GIF invests in.

Unlisted property is first-ranking mortgages secured over New Zealand properties.

Cash and cash equivalents are on-call deposits with New Zealand registered banks.

New Zealand Fixed Interest is term deposits with New Zealand registered banks.
